

WISCARD DEPOSIT

APP REDESIGN

Anna Burson, Aleeya Roki, Nsikan Morgan, Sharath Ragila

PROBLEM SPACE

The current Wiscard website is frustrating and not user-friendly

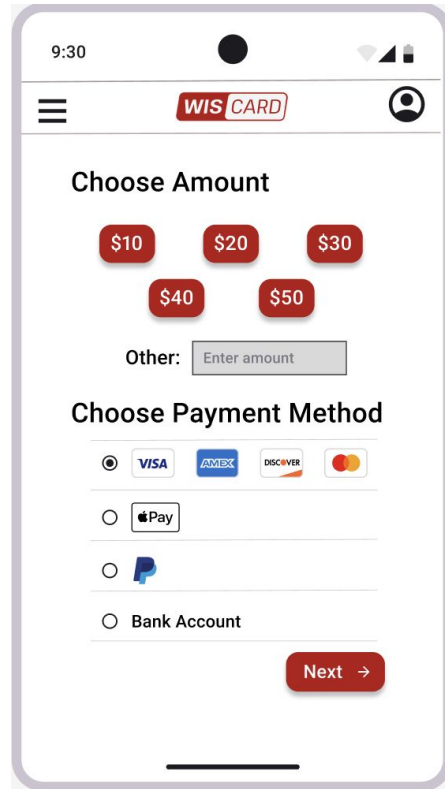

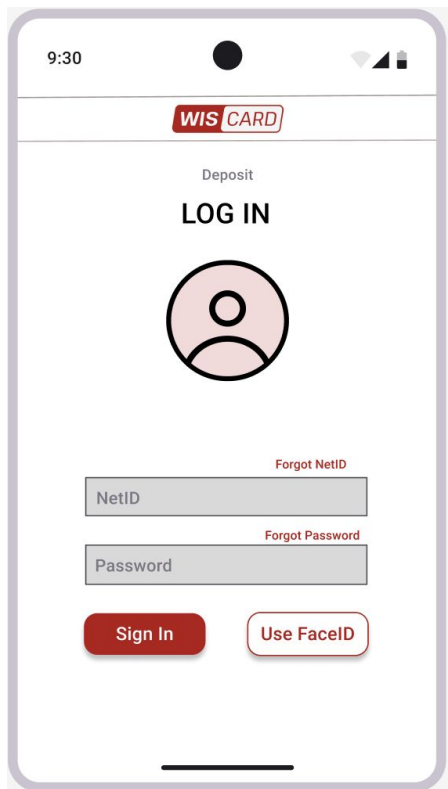

- Users must access through MyUW portal, with many unnecessary login steps
- Users must re-enter payment info every time
- Users can only deposit a minimum of \$15
- The deposit option is hard to find and buried in MyUW.
- Payment terms like ACH vs. credit/debit are unclear and frustrating

Goal: Make Wiscard deposits fast, intuitive, and mobile-friendly.

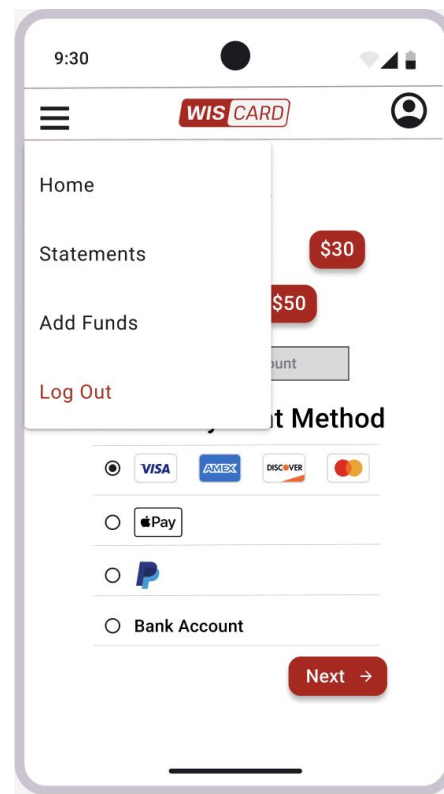

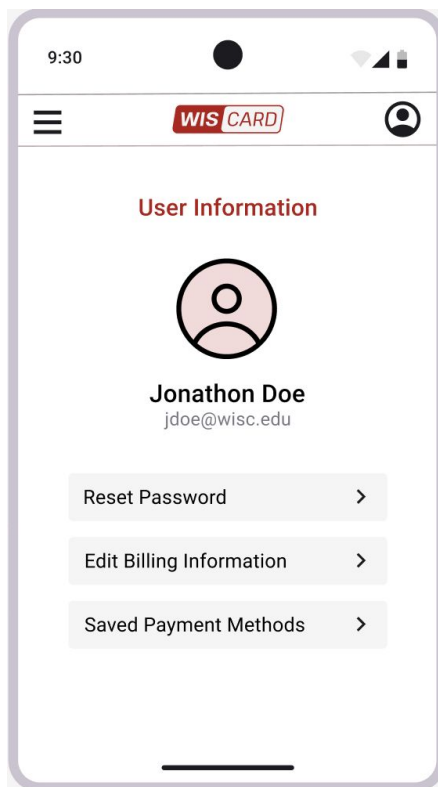

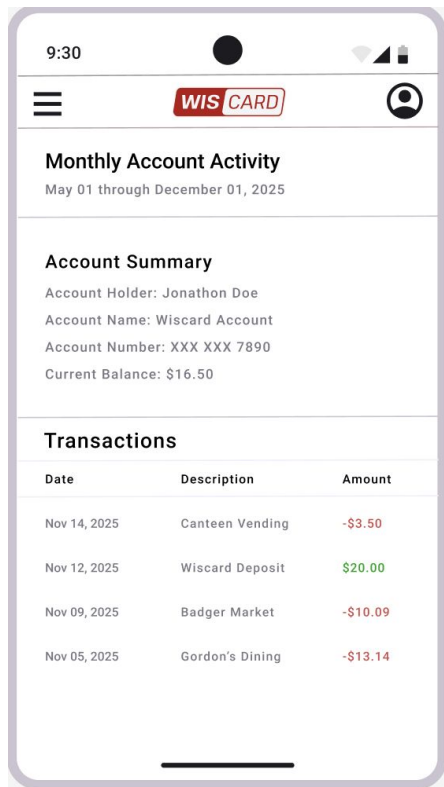

- Mobile-friendly app and clean Wiscard-branded interface
- Quick biometric login options
- Clear and fast navigation through a hamburger menu
- Streamlined deposit flow with preset buttons for deposit amounts, no minimum requirements
- Saved payment methods
- Transparent, straightforward payment options

SOLUTION OVERVIEW

KEY INSIGHTS

Insight 1: Depositing is too slow, repetitive and frustrating

- Users disliked re-entering credit card info and having to deposit a minimum of \$15
- We added saved payment methods + shortened steps, no minimum amount required

Insight 2: Navigation is confusing and unclear

- Deposit option buried under MyUW navigation bar
- We added a 'Deposit Funds' button as the first thing users see and a universal hamburger menu navigation available on every page
